

Biomedical Technology in the Japanese Market

Market Entry Through the City of Kobe

Entry into the Japanese Biomedical Market Through the City of Kobe

Tuesday | March 23, 2021 | 9:30 a.m. to 11 a.m. CET | online

Due to the corona pandemic, international cooperation in the field of biomedical technology has become even more important. Kobe has had good experience with European companies for a long time. On this basis, the cooperation is now to be accelerated and expanded. The city offers many advantages in terms of size, location, environment and economic strength.

In addition, there are special programs and funding measures that make getting started in Japan much easier. Japan's largest research and development hub for biomedicine with 369 companies is located on the artificial island Port Island. This results in ideal opportunities for cooperation and exchange.

With this in mind, we would like to cordially invite you to our virtual event together with the Kobe Business Offensive, Foundation Biomedical Research and Innovation at Kobe (FBRI) and Dürr Dental Japan K.K.

We look forward to your participation.

Agenda

Welcome
